

Floral Arranging

Supplies needed:

- *2-5 flower bunches from the store or your garden
- *1-2 bunches of greenery (eucalyptus is a favorite!)
- *multiple vessels of different sizes to place your flowers in (small glass jars, recycled tin cans, old wine bottles, old candle holders, anything really can work!)
- *scissors

How to:

1. Unwrap and lay out all of the flowers and greenery on a table/countertop/outside on the ground; wherever you will be arranging.
2. Fill your vessels with water.
3. Cut and trim flowers at a diagonal angle, have fun mixing and matching your florals and greenery!
Some tips:
 - *different heights can really change the look
 - *you probably will need to trim leaves
 - *greenery can really help hold flowers in place in your arrangement
 - *Play around with the heights of the different flowers
4. Place the finished arrangements around your space (bedside table, coffee table, bathrooms) and if you have extra, drop one for a friend or neighbor to make their day!
